TOOLS REQUIRED		INSTALLATION NOTES	
<div><div>RATCHET</div></div> <div><div>TORQUE WRENCH</div></div> <div><div>14MM SOCKET</div></div>		<div>TORQUE NOTE: Bolts and nuts should be torqued to 15-20 ft lbs.</div> <div>NOTE: Hardware for Board Installation is included.</div> <div>NOTE: Some spare hardware is included.</div>	

Remove all contents from the package and check brackets for any damage. Also, verify that all components and hardware listed above are included before you begin installation. If anything is missing or damaged please contact us at customerservice@cyc-engineering.com

Read through entire installation manual and installation drawings to ensure that you understand all of the components and hardware before proceeding with installation.

NOTE: When installing the brackets, all hardware must be left loose until all of the items are attached.

Locate factory hole locations in three (3) places per side on the body mount.

BRACKET ORIENTATION

DRIVER SIDE

Raptor
Series

1. Begin installation on driver side. Position the Front Bracket, the Center Bracket and the Rear Bracket as shown in diagram.

2. Driver Side Front Bracket cradle (2a), Driver Side Center Bracket cradle (2b) and Driver Side Rear Bracket cradle (2c) will face toward the front of the truck.
